

# Distributed Systems Final Project

## RSA Factoring

**Goal:** To factor RSA numbers using a distributed algorithm for codebreaking.

# How does it work?

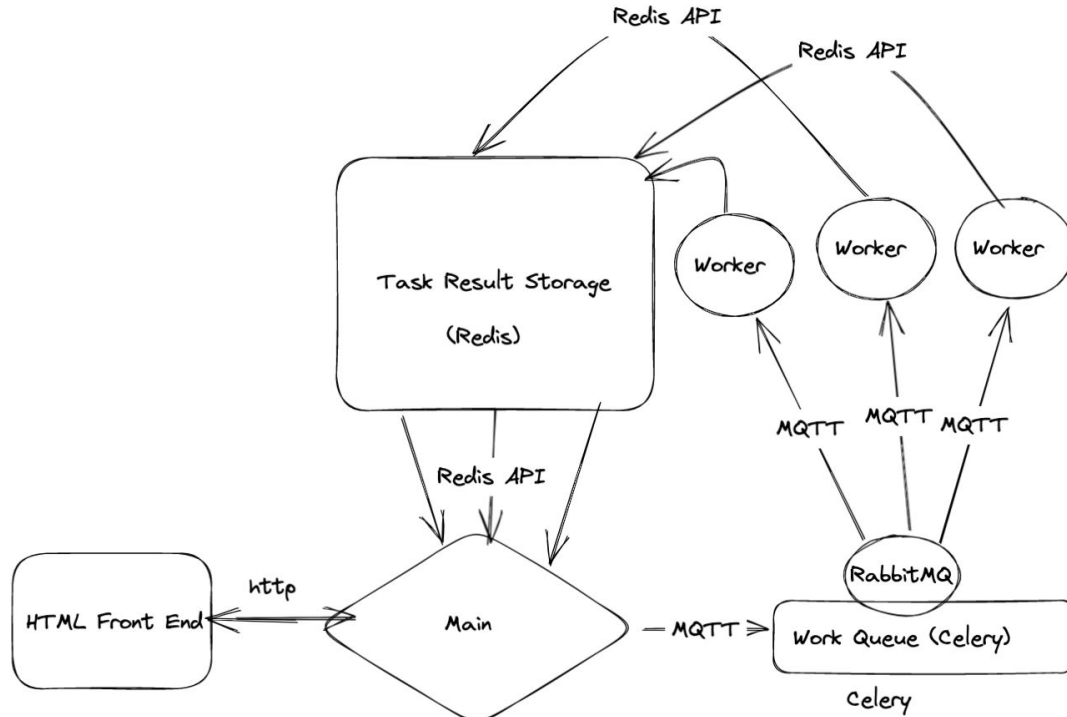

---

## Number Factorization

### Factor Number

**The factors for 1040971177251392583329491 are 2039808034807 510328011013**

# Implementation

# How well did we do?
